WHAT CHANGED SINCE THE ORIGINAL

Bengals / Steelers [1]	Warren shoulder: QUESTIONABLE. Dowdle: OUT. Brown is not listed. Do not treat the Pittsburgh backfield as fully cleared.
Seahawks / Commanders [5]	Price and Darnold have no game designation. Daniels: OUT; Mariota expected to start. JSN is not listed.
Titans / Giants [8]	Pollard has an ankle entry but no game designation. Spears: QUESTIONABLE. Dart is on IR. Skattebo is not listed.
Chargers / Bills [3]	Coleman and DJ Moore remain QUESTIONABLE, not confirmed out. Cook, Allen and Hampton are not listed.
Texans / Colts [7]	Nico Collins: OUT. Taylor was full after a rest listing and has no game designation.
Other listed TD players [2,4,6,9]	Gibbs, Walker, Hubbard, St. Brown, Hall, Achane and Tuten are not listed. Judkins practiced fully after a non-injury entry.

The original "safe" labels and supplied 50%, 37%, 18%, 9%, 2.6% and 0.2% hit estimates were not independently supported. They are removed. No current price edge or positive expected value has been established.

13 / SUPPLIED SHEET + INDEPENDENT CALCULATIONS

Source: your two screenshots of BoringBets_NFL_Week_3.pdf. Odds were transcribed and total returns recalculated. Decimal odds = 1 + odds/100 for positive prices, or 1 + 100/|odds| for negative prices. Implied probability = 1 / decimal odds. Profit = total return minus stake.

For independent parlays, multiply decimal prices; implied probability is the reciprocal of that product. This retains bookmaker margin and assumes independence. Same-game combinations need an actual bookmaker quote and settlement rules. A passing touchdown does not ordinarily count as a quarterback scoring a touchdown; confirm each market's rules.

Not verified: live Kalshi contracts/fees, live prices for the original DK rows, final actives, weather-adjusted forecasts or any proprietary win model. No new predictive model or player-performance stats are claimed in this report.
